» Utility Predator

Like the Troller Series, the 2007 Strikers remain unchanged. These wonderfully easy-to-fish boats combine simplicity with some of the most advanced features available to any fisherman. Three models in the Striker Series for this year all offer our traditional semi-V hull design that has crossed northern and upper midwest waters for decades. They are incredibly easy to trailer and launch, even at the most remote lakes. Storage, livewells, carpeted flat floors, navigation lighting, comfortable pedestal seating, and rod storage add up to great performance on the water. For even more performance, add a dependable Mercury outboard.

x Standard Equipment
* Optional Equipment
