For 2007 the Troller remains virtually unchanged. Consisting of 5 models, three tiller and two side console, they continue to cover the performance and value equation. The console models 1677 and 1616 feature a new fiberglass console. All Troller models offer our Deep-V hull with molded-in spray rails for a dry ride and truly great handling. Trollers are very capable performance fishing machines. Just one look at the list of standard features and available options will verify that. When combined with the Yamaha outboard of your choice, they offer unmatched performance and value for years to come.
